Icon Name

There are many different types of icons that you can use in your app. Some icons are simple shapes, while others are more complex. You can use icons to represent different types of data, such as a list of items, a single item, or a group of items. You can also use icons to represent different types of actions, such as a button to click or a button to drag. The icons that you use in your app should be clear and easy to understand, and they should be consistent with the overall design of your app.
